

menARD

Environment

We are committed to undertaking business in a manner that recognises:

- The importance of Environmental Management to prevent pollution and minimise impact
- The importance of Sustainability in construction to ensure future generations will have the same ability as current ones to meet their needs
- The need to be a responsible and respected corporate member of the communities within which we operate.

In order to achieve this, we will:

- Commit to working in a manner that consistently prevents pollution and minimises waste.
- Periodically review and adjust our processes to minimise their impact on the environment to levels as low as reasonably practicable.
- Ensure compliance with legislative, regulatory and other environmental requirements
- Set specific targets against our environmental objectives to drive continual improvements in our performance.
- Promote environmental awareness through communication and training, while encouraging all employees and subcontractors to take personal responsibility.
- Monitor industry standards and best practice to ensure that we meet community and stakeholder expectations.
- Communicate our policy and share our performance outcomes with stakeholders and other interested parties.
